MADISON, Wis. — Two separate measures regarding lake trout harvests in lakes Superior and Michigan gained approval by the Wisconsin Natural Resources Board on Wednesday.

The separate measures reflect the difference in lake trout abundance between the two Great Lakes. Next steps will involve stakeholder meetings in both regions.

For Lake Superior: The Natural Resources Board approved an emergency rule to amend lake trout harvest rules for the 2016-17 harvest season to reflect continued challenges to the population. Terry Margenau, DNR Lake Superior fisheries supervisor, said the recreational season runs from Dec. 1, 2016 through Sept. 30, 2017. The commercial fishing season is open from Nov. 28, 2016 through Sept. 30, 2017.

Under the rule, in the area known as WI-2 extending east of Bark Point, only two lake trout may be harvested per day. In WI-2, lake trout must be greater than 15 inches but only one may be greater than 25 inches. If the recreational harvest reaches 7,350 or 75 percent of the total allowable recreational lake trout harvest of 9,800 fish, the recreational lake trout season will close with no further harvest or fishing for lake trout allowed in the WI-2 area.

West of Bark Point, in the area known as WI-1, the current three fish daily bag limit will remain for lake trout with a 15-inch minimum size limit and only one lake trout may be harvested over 25 inches. Even if the recreational season closes east of Bark Point, up to three lake trout per day may continue to be harvested west of Bark Point.

The emergency rule separates lake trout from the current five total daily bag limit for trout on Lake Superior. Under the rule, anglers will be able to take up to two (WI-2) or three (WI-1) lake trout per day as well as up to five other trout per day.

“While lake trout were formerly part of the five trout bag limit, the new rule will allow an angler the potential to harvest, for example, five brown trout plus their bag of lake trout,” Margenau said. This would apply to both WI-1 and WI-2 waters of Lake Superior.

The rule also revises harvests for commercial fishermen and prohibits previously allowed fishing in the Gull Island refuge. However, because of agreements among the parties to the Lake Superior Fishing Agreement, the rule also removes restrictions from the Hagen’s Beach area, opening this area to commercial fishing between June 1 and Aug. 31, 2016.

Margenau said the department anticipates holding a public meeting in January or February as part of the rule development effort.

For Lake Michigan: The Natural Resources Board approved a scope statement for development of an emergency rule and a permanent rule. Changes to the current lake trout

Wisconsin Natural Resources Board Approves Separate Lake Trout Measures for Lakes Superior, Michigan

 rules could include an increase in the lake trout daily bag limit from the current level of two lake trout per day; allowing a year round open season in the Wisconsin waters of Lake Michigan, except for the Mid Lake Reef Complex; and allowing fishing on the Mid Lake Reef Complex from January 1 to September 30.

The scoping statement and rule development effort follow a series of stakeholder meetings in 2016 during which angler expressed interest in expanded fishing opportunities for lake trout. Comments received also favored changing the regulations for lake trout.

Brad Eggold, Great Lakes District fisheries supervisor, said the department anticipates holding a public meeting in January or February as part of the rule development effort. For more on Lake Michigan fisheries management, visit dnr.wi.gov and search “Fishing Lake Michigan.”

ICE:

It is good for people to remember that no ice is ever completely safe. Lakes and rivers are dynamic places with water currents, springs, water control structures, cattails, snow cover and many other factors that affect the thickness of the ice and how it forms. Many of these factors are hidden from us and are difficult to see. Knowing that ice is never completely safe, here are some guidelines on what loads good, clear ice can hold:

- 4 inches can hold a person
- 5 inches can hold a snowmobile
- 10-12 inches can hold a small car
- 12-16 inches can hold a light truck

If people are going to venture onto the ice here are some safety tips to keep in mind:

- Talk to someone familiar with the lake you are going to visit about ice conditions.
- Take a set of ice picks or nails with to help you get back on the ice in the event that you fall in.
- Let someone know where you are going and when you will be back.
- Remember that standing or parking in a group will require more ice than what is recommended in the guidelines.
- Ice conditions can change from day to day.

NOTICE

The Wisconsin Wildlife Federation (WWF) has been generously granted steel-shot ammunition from the National Wildlife Federation (NWF) and Ervin Industries. In turn, WWF is offering this product to its affiliate organizations to support youth day and mentored youth hunts that are planned and executed by WWF affiliated clubs around Wisconsin.

On February 23rd, you can actually sell until the 16th of January but be sure that your stubs are returned in time for the drawing. We are having a successful year so far in sales and hope to top last years. Our calendar committee is meeting this Friday night and hope to bring new items to the 2018 calendar. Thanks everyone who sold calendars for WWF. We truly appreciate and wish you good luck in the drawings.

Award Nominations

We the undersigned hereby petition our state of Wisconsin Legislators to pass and the Governor to sign legislation that will restore the right of the public to gain it is time to start getting your nominations in for our annual Award program which is April 22nd, 2017 at the Mead Hotel in Wisconsin Rapids. The necessary info is in Wisconsin Conservation. Remember to submit the form with it with full info included so we can reach the winner. Return your entries to the office by March 17th to be eligible. If any questions please contact the office or myself at 920-876-4312.

Petition to the Wisconsin Legislature and Governor to Restore Public Access to Public Land and Water

For over 100 years, state law allowed the public to directly cross railroad tracks in Wisconsin. Now Wisconsin citizens are denied this safe traditional legal access to hundreds of miles of wild public Wisconsin land and water due to an unjustified law change in 2006. DNR identified 134 former RR crossings to the Mississippi River which could not be used because of the threat of trespass. In addition 121 DNR wildlife areas fishery areas, forests, natural areas and parks have RR crossing which makes access to major portions of these properties are difficult or in some cases impossible to access without trespassing due to the 2006 law change. For over 100 years it was legal and safe for people to step across railroad right-of-way to access public lands and waters. Almost all fatalities of people on foot are at dedicated crossings not those just stepping directly across the right of way for recreational purposes. A bill to restore the right for the public to legally step across the railroad right of way passed the Assembly late in the 2016 legislative season but was not considered by a senate committee. Anglers, hunters, birders, trappers, photographers, hikers, cross country skiers, resort owners, business leaders, tourism leaders, local government officials, agency staff, sheriffs, judges and district attorneys have expressed their concern about the loss of this long held right to public access of lands and waters.

We the undersigned hereby petition our state of Wisconsin Legislators to pass and the Governor to sign legislation that will restore the right of the public to legally step across railroad right of way to gain access to public land and water.
CONSERVATION OF THE YEAR
For the outstanding overall conservation efforts and achievements in any field of natural resource management, for a significant contribution to the cause of conservation, or for meaningful progress or achievement toward a solution of a major conservation problem in the state during the past year. Nominees from all other categories can be considered for the Conservationist of the Year Award.

CONSERVATION ORGANIZATION OF THE YEAR
For outstanding contributions to the conservation of natural resources by an organization in the state for an extended period of time. Statewide or local organizations including sportmen’s clubs or civic organizations are eligible. The recipient should have demonstrated keen interest in projects and programs within the state which deal with significant natural resource or issues.

CONSERVATION LEGISLATOR OF THE YEAR
For outstanding legislative accomplishment during their career which has made a significant contribution to the preservation and management of our state's natural resources.

WILDLIFE OR FISHERIES CONSERVATIONIST OF THE YEAR
For outstanding efforts and accomplishments in making a significant contribution to the management and/or restoration of wildlife resources in Wisconsin over the course of their career.

HUNTER SAFETY EDUCATOR OF THE YEAR
For outstanding efforts by an individual volunteer or organization over an extended period of time in the education of hunter safety. Also such efforts by an individual or organization that has developed an innovative and successful method of educating novice hunters in hunter safety.

CONSERVATION COMMUNICATOR OF THE YEAR
For outstanding conservation efforts by a person, group, newspaper, magazine or radio or television station or a form of social media in the state. The recipient of this award may be any recognized communication medium within the state that has accomplished a high degree of public awareness of the importance of natural resource conservation.

SOIL, AIR, AND WATER CONSERVATIONIST OF THE YEAR
(3 categories)
For outstanding contributions to the conservation of our soil, air, or water. Recipient could be a landowner, administrator, technician or organization involved with such things as watershed management, soil conservation measures, wetlands or estuarine conservation, wild rivers protection and protection of surface or groundwater water quality or quantity standards.

WARDEN OF THE YEAR
For outstanding efforts relating to environmental and conservation law enforcement, community outreach and educational programs over their career.

OFFICIAL NOMINATION APPLICATION
The Wisconsin Wildlife Federation invites you to nominate a person or group who has shown outstanding conservation effort and achievement in any of the categories listed. To make a nomination, send one copy of this form and a copy of a résumé. Attach all supporting documents and send to the above address. Deadline for receiving nominations is March 17, 2017.

1. Please read the general rules carefully.
2. Follow the outline covering the category for which the nomination is being made.
3. Attach typewritten copy of a résumé of achievements.
4. Include organizational memberships, affiliations, past achievements for which nomination is based on.

OFFICIAL CALL FOR RESOLUTIONS!
For presentation at the 2017 Annual Meeting of the Wisconsin Wildlife Federation. What is a resolution?
• A formal, written motion which follows a specific format.
• Why submit a resolution?
• To set a course of action for the WWF Board of Directors to follow.
• To set and express an opinion of the WWF.
Who can submit a resolution?
• Any individual associate or sustaining member – please contact an Associate Director or District Director to submit it on your behalf.
• Any member of the WWF Board of Directors.
• Any individual associate or sustaining member – please contact an Associate Director or District Director to submit it on your behalf.
• Any affiliate organization of WWF, regardless of size.
How should a resolution be submitted?
• Typed on official organization letterhead preferred.
• Signed by the author and/or officer of the submitting organization.
• Mailed to the WWF office.
• Postmarked no later than March 17, 2017.
What topics should resolutions deal with?
• Issues pertaining to natural resources and their management or the environment.
• Issues of importance to the entire state.
Mail your resolutions to:
Wisconsin Wildlife Federation
213 N. Main St., Suite 100
PO Box 460
Poyntette, WI 53955

Contact the office for additional information or for specific writing format guidelines.
(800) 897-4161
What the Wisconsin Wildlife Federation Is Doing For Wisconsin Sportsmen and Women

1. Leading efforts to convince Congress not to sell or transfer wholesale National forests, parks and fish and wildlife refuges.

2. Working hard to pass legislation to remove the wolf from the Federal Endangered Species List.

3. Successfully fought a state budget proposal that would make the Natural Resources Board only an advisory group.

4. Successfully fought a state budget proposal that would ban DNR public land purchases for thirteen years.

5. Successfully petitioned DNR to restore the northern coyote season during the nine-day gun season.

6. Successfully worked with other sports groups to pass a wolf management law allowing hunting and trapping of wolves.

7. Worked with other groups to pass the Hunting Mentorship law and the Hunter Recruitment and Retention Act.

8. Worked with other groups to pass the Concealed Carry law.

9. Successfully fought to get strong rules for public access for hunting, fishing and trapping on Stewardship purchased land.

10. Successfully filed 40 appeal to open 949 acres closed by the Chequamegon-Nicolet National Forest.

11. Successfully worked with Southeastern WI area field triers to restore adequate field trialing at Bang Recreational Areas.

12. Worked with the Wisconsin Trappers Association to successfully reform wild fur possession and sale statutes (green fur bill).

13. Appealed four DNR decisions denying public access for trapping and hunting on lands purchased with Stewardship funds.

14. Successfully drafted and passed a bill streamlining laws for wetland restoration projects which will net Wisconsin millions of dollars to restore wetlands.

15. Worked with dog interest groups to assure that legislation regulating dog breeders has minimal impact of sportsmen and women.

Wisconsin Wildlife Federation Continues Its Major Efforts in Youth Conservation Education

1. Established a long-term commitment to maintain school-based environmental education at the MacKenzie Environmental Education Center in Poverty Bay.

2. Created a Wisconsin Conservation Leadership Program for high school and college students to develop a new generation of conservation leaders.

3. Provides grants to organizations holding outdoor skill classes related to hunting, fishing and trapping.

4. Provides two staff wildlife biologists for nine Wisconsin schools to have weekly outdoor conservation learning experiences.

5. Sponsors ten annual scholarships to the UW-Stevens Point College of Natural Resources for future fish and wildlife managers, foresters and wardens.

6. Sponsors youth scholarships for conservation summer camp.

7. Furnishes free of charge fully equipped educational trunks for schools and camps (K-12) for upholding cranes, bears, wolves and small mammals.

8. Continue active input on threats to the Great Lakes Compact.

9. Continue push to passed a Class I and Class II training and trialing area on the Sauk Prairie Recreation Area.

11. Press for legislation removing requirement for on dog tags for bear and wolf hunting.

13. Continue effort for quality dog training area on the Rainbow Springs property.

14. Continue to monitor Wisconsin Department of Agriculture implementation of the state's Dog Breeder regulations.

15. Monitor and oppose anti-sport dog ownership legislation on a state and federal level.

16. Work to get new replacement of Class I Trial Area at Pine Island.

17. Continue efforts to resolve Breeder Class I Dog Trialing area user conflict issues.

19. Monitor and oppose ever re-strictive municipal ordinances on ownership and breeding of dogs.

I. Endangered and Nongame Species

20. Continue to advocate for local, county, and state efforts to increase development of habitat and programs that increase the Monarch Butterfly and other butterfly species populations in Wisconsin and the United States.

21. Advocate with the EPA, US Fish and Wildlife Service, US Department of Agriculture and appropriate Wisconsin agencies to ban the use of Neonicotinoids and neonic pesticides that are decimating honeybee populations in Wisconsin and the United States.

22. Support additional funding for the Federal State Wildlife Grant program.

J. Education Committee

23. Support legislation to restore funding for the Wisconsin Environmental Education Board grants.

24. Continue to develop increased use of the WWF Outdoor Skills Grant Program.

25. Send one youth to summer camp from each WWF Banquet.

27. Increase the use of the WWF Educational Trunk program.
Wisconsin Wildlife Federation
NWF Steel Shot for Youth Programs

The Wisconsin Wildlife Federation (WWF) has been generously granted steel-shot ammunition from the National Wildlife Federation (NWF) and Ervin Industries. In turn, WWF is offering this product to its affiliate organizations to support youth day and mentored youth hunts that are planned and executed by WWF affiliated clubs across Wisconsin.

Requirements:
1. Applicant must be a current WWF affiliate organization.
2. Ammunition must be used to support youth day and mentored youth hunts.
3. Events in which the ammunition is used must be planned and executed by the WWF affiliate organization.
4. Applicants must agree to report the number of youth/new shooters served, location of sponsored event, description of activities, and media/photographs of the sponsored event.

Additional Information:
- Steel shot ammunition supplies are limited, this is a one-time offer.
- Applicant must be a current WWF affiliate organization.
- Deadline for application is March 1, 2017.
- Applications will be notified of their status by April 1, 2017.
- WWF will deliver (in person) the ammunition to your organization, after April 1, 2017.
- Ammunition will not be shipped.
- Each event for which you’d like to apply for ammunition must be submitted with its own application.

By signing below, applicant and associated WWF Affiliate Organization acknowledge that:

1. Applicant must be a current WWF affiliate organization.
2. Steel shot ammunition supplies are limited, this is a one-time offer.
3. Events in which the ammunition is used must be planned and executed by the applicant.

Please complete the following application and return to WWF by March 1, 2017.

Name of Affiliate Organization: _____________________________________________

Number of boxes of ammunition requested:

Date(s) of Event: ________________________________________________________

Location where the event will take place: _____________________________________

Name of Event: _________________________________________________________

Contact Phone: _________________________________________________________

Contact Address: _______________________________________________________

Contact Email: _________________________________________________________

Applicant Signature:_____________________________ date: ____________________

Office Use Only:

Delivery ____________________________

Please select your preferred Shot Size:

- Shot Size of 7 + 1 box per participant up to 20 boxes (i.e., youth shooting events)
- Shot Size of 6 + 1 box per participant up to 5 boxes (i.e., mentor hunts & hunter safety)

Please include a brief description of the activities in which the steel shot will be utilized. (Flyers, brochures, etc. are also encouraged to submit – please attach)

By signing below, applicant and associated WWF Affiliate Organization acknowledge that the steel shot will be used to support youth day and mentored youth hunts. In addition, applicant agrees to submit photos and other media of event for WWF/NWF promotional use.

Cold, Windy December Day Yields Important Data for Lake Michigan Fisheries Management

Board the Research Vessel Coregonus – At a time of year when most Lake Michigan anglers are content to count their blessings, Wisconsin Department of Natural Resources fisheries staff are out counting fish.

With a cold, northwesterly wind blowing across a mile of open water on this December day, it’s not an easy job. Lifting two gangs of gill nets, each holding some 1,650 feet, the four fisheries team members aboard the DNR Research Vessel Coregonus are collecting data that will help inform management decisions on yellow perch and round whitefish.

The team is led by Dave Schindelholz, a retired fisheries technician with more than 15 years of experience who is serving as biologist-in-charge. Working in an enclosed lab and processing space behind the boat’s pilot house, Schindelholz alternates between freeing fish from the incoming net and recording data from the entire team so that surviving fish can be quickly released.

Joining him are Brandon Bastar, the research vessel’s captain; Tim Kressel, a fisheries Technician based within DNR’s Sturgeon Bay; and Tom Burszycki, a fisheries technican with Schindelholz out of Milwaukee. As the men wait for the hydraulic winch to reel in the next round of fish, they talk casually about how cold air moving over warm water creates bigger waves — seemingly oblivious to the effects of the unpredictable waves as the 60-foot boat pitches forward and backward as it rolls.

“The Coregonus is a critical part of our research efforts and really allows us to work safely and efficiently in all kinds of weather,” Schindelholz says. Commissioned in 2011, the vessel’s name dovetails from the genus of nine species of fish native to Lake Michigan including the commercially important lake whitefish, lake herring and bluster chub.

Equipped with a computer that is 10-person life raft, emergency positioning beacon, cold water survival suits and watertight compartments to keep the boat afloat if the hull is punctured, the Coregonus represents a major upgrade over the 74-year-old RV Barney that was retired after the 2010 season. A key feature of the Coregonus is the large winch system used for handling in weighted gill nets that are hung in established locations and stay out between 20-foot to 2,000 feet.

The boat also supports the use of trawl nets and diving survey work. The size and scope of its capabilities keep the Coregonus busy almost continuously from early April through December as fisheries staff conduct assessments of whitefish, lake trout, burbot, whitefish and yellow perch, as well as Green Bay offshore fishing activities from its home port in Sturgeon Bay. The Coregonus travels from northern Lake Michigan and Green Bay south to Algoma, Port Washington and Milwaukee.

The yellow perch work that takes place in early December is conducted over known spawning habitat in 65 to 80 feet of water. To maximize the benefits of the time on the water, Schindelholz and the crew are also collecting data on round whitefish populations and alewife numbers as well as information about the yellow perch.

“Our focus at this time of year is on the yellow perch because we have ongoing concerns about the survival rates given the changing Lake Michigan ecosystem,” Schindelholz says. The appeal of a new fishing program for aquatic invasive species such as zebra mussel and zebra salmon reduces the volume of phytoplankton and ultimately spoils avaiability for young perch, which also face competition for habitat from invasive zebra mussels.

The December perch surveys follow spawning assessments conducted in early June with both gill nets and dive teams.

The invasive mussels and gobies make their presence known as the gill net rolls up from the depths, streaming in through a sleeve inside the processing area of the Coregonus. Hung the previous day, the net yields a remarkable diversity of aquatic species — including invasive mussels that are caught in the plastic mesh and clatter around on the table as the fisheries team members pull them off. Round gobies meet a fitting end as they are tossed back outside the window to a flock of waiting seagulls.

A few young perch have found their way into the net, important evidence that the biologically significant overlap of species continues to reproduce on the historic spawning grounds. It will take additional data collection and analysis in the future to determine how many species fit into the broader trends observed in recent surveys.

Back on shore, inside UW-Milwaukee’s School of Freshwater Sciences, Schindelholz and Burszycki set to work on the whitefish, measuring, weighing and dissecting them with surgical skill to check on the overall health of the fish and remove the delicate otoliths or ear stones that can be used to track the fish’s age and its movement. The otoliths are then shipped to the DNR’s Research Laboratory in Milwaukee where they are tossed back outside the window to a flock of waiting seagulls.

“We’re fortunate to have the dedicated people who work on this, who need to perform our full range of work,” Eggold says. “This type of application is critical to understand the population dynamics of key species and the impacts of lake-wide changes in the Lake Michigan food web. The work is fundamental to our fisheries management efforts.”

To learn more, visit dnr.wi.gov and search “Research Vessel Coregonus.” For more information about Lake Michigan management efforts and news of upcoming opportunities for stakeholder engagement, visit “Fishing Lake Michigan.”
Most events begin around sunset and run until 8:30 or 9 p.m. for more than a thousand visitors. Last year a candlelight event at Friends Shelter, and enjoy some hot food, baked goods and commemorative shirts for sale. Enjoy the bonfire and enjoy hot chocolate and hot cider, apples and other snacks available for purchase. Weather and snow conditions determine trail use. Sponsored by the Friends of Governor Dodge. Sor-

Paradise... The hiking/snowshoe portion will take place between Lake 1 and Lake 2. The Zillmer shelterbuilding will have coal and/or charcoal available for purchase. Weather and snow conditions determine trail use. Sponsored by Friends of Governor Dodge. Please note: The Department of Natural Resources (DNR) is waiving parking fees at all participating state parks on event days. For more information, visit dnr.wi.gov or call 608-264-4000.

January 14, 2017

Kettle Moraine State Park Candlelight Ski, Hike and Snowshoe. The Kettle Moraine State Park is located 3 miles east of Oak Creek off County Road W. Day-use fees at the trailhead will be waived for this event. The trail has no steep hills or sharp turns. The Zillmer shelterbuilding will have coal and/or charcoal available for purchase. Weather and snow conditions determine trail use. Sponsored by the Friends of Governor Dodge. Please note: The Department of Natural Resources (DNR) is waiving parking fees at all participating state parks on event days. For more information, visit dnr.wi.gov or call 608-264-4000.
