

The Wisconsin Wildlife Federation has a dual mission to engage in conservation education and to advocate for sound conservation policy.

The Federation's education focus is on the protection of fish and wildlife and their habitat and in the teaching of skills including hunting, fishing, trapping and other outdoor recreational pursuits. Our efforts are largely focused on youth education. We grant scholarships for future resource professionals at the University of Wisconsin-Stevens Point, have developed a leadership program for the next generation of conservation leaders, provide wildlife educational trunks to schools for K-12 education, send kids to summer conservation camps, work with Kids and Mentors Outdoors to establish mentor programs to get young men and women outdoors and support the National Wildlife Federation's Schoolyard and Backyard Habitat programs.

We also are very active in promoting strong conservation policies before the Wisconsin Legislature and the Department of Natural Resources. The prime areas of conservation policy that we focus on are the protection of fish and wildlife habitat, the protection of public access to lands and water for outdoor recreation, assuring the right to hunt, fish and trap and the pursuit of other outdoor recreational activities and the furtherance of conservation education with an emphasis on youth education. We strongly believe that conservation policies should be scientifically, professionally and factually based, not politically based.

We are the state affiliate of the National Wildlife Federation. Together we promote the protection and conservation of our natural resources on a national level with the U.S. Congress and federal agencies.

With these goals in mind, our primary source of fundraising is our annual raffle calendar. We are approaching businesses and other groups looking for contributions for our list of prizes. In return for your generous help, we are offering **one free ad placement in our calendar along with recognition on our website plus a free calendar for 2020, plague and monthly recognition in the Wisconservation paper which is distributed throughout the state.**

Thank you for your time in considering our organization.
