Smith: Preston Cole an excellent choice as DNR Secretary

F or many in the Wisconsin conservation community and me, the impending changing of the guard in the governor’s mansion focused attention on one cabinet position: the Secretary of the Department of Natural Resources.

As you likely heard, on Wednesday Governor-elect Tony Evers appointed Preston Cole of Milwaukee as the next leader of the agency.

We’re outside of baseball season, but since the Milwaukee Brewers are active in the trade market, I’ll use an analogy from America’s pastime: Cole’s selection is a homerun.

I’ve been covering the DNR since 1994 for daily Wisconsin newspapers and have seen six DNR Secretaries in the role.

In all due respect to others who’ve held the post, in my view Cole is the most qualified DNR Secretary appointee since George Meyer.

In contemporary government, the 56-year-old Cole presents a rare and valuable combination of talent, temperament and experience.

He grew up on a farm in Michigan and graduated with a degree in forest management from the University of Missouri.

Cole then worked for a decade as a forester for the Missouri Department of Conservation, allowing him to see the inner workings of one of the nation’s leading natural resources agencies.

In 1991, he transferred to the City of Milwaukee to become forestry services supervisor. He’s worked in a series of advanced management positions for the last couple decades, rising to operations director in the Department of Public Works.

We’ve got supervisory and managerial experience of how government works, a critical part of the resume for a DNR leader.

Perhaps even more importantly, he knows the DNR and most of its staff.

Since 2007, Cole has served as a member of the Natural Resources Board, the seven-member citizen body that oversees the DNR.

Cole was appointed by Gov. Jim Doyle, a Democrat, and re-appointed by Republican Gov. Scott Walker in 2011. For two years Cole served as chairman of the board.

And then there’s Cole’s emphasis on science.

“I’d like to double down on science (as) the epicenter of natural resource management,” Cole said at Wednesday’s press conference as reported by my colleague Lee Bergquist.

In his time on the NRB, Cole has also demonstrated his push for transparency.

He was a driving force to get board meetings broadcast on the Internet so the public can see for themselves how the board and DNR make decisions.

Finally, there’s Cole’s personality. He conducts himself in a respectful, even diplomatic, manner.

This was evidenced in cheers to his appointment. Notably, support came from both sides of the political aisle.

Gov. Scott Walker said: “Preston Cole is a solid pick for Department of Natural Resources secretary. He did a good job on the board and understands the importance of the entire state.”

Former DNR Secretary and former Republican state senator Cathy Stepp tweet-ed: “I applaud! A balanced, articulate, accomplished guy who I was proud to support for the NRB. Looking forward to working with him in his new role!”

Wisconsin’s Green Fire said it was “encouraged” by Evers’ selection of Cole.

“Wisconsin’s Green Fire describes itself as an independent, nonpartisan organization of retired and active natural resource professionals and supporters, whose mission is to promote the use of science in natural resource management decisions.

Meyer, the former DNR Secretary and current executive director of the Wisconsin Wildlife Federation, said “Preston is an outstanding choice.”

Such a range of support for an appointee is rare in today’s extremely polarized political environment.

The job of DNR Secretary in 2019 is arguably more challenging than ever.

The agency’s staff and funding have been cut in recent years and its morale has suffered from a realignment and internal policies that have stifled its expertise.

Cole will be tasked with the growing problems of chronic wasting disease in the state-and deer herd and nutrient runoff and groundwater contamination.

I have no doubt Governor-elect Evers will present a budget that will attempt to provide the DNR more resources in terms of funding and personnel.

What the end product holds after negotiations with the Republican-controlled Legislature is anyone’s guess.

This much I know: Preston Cole is the right person for DNR Secretary. If you care about the state’s natural resources, you will, as I do, wish him great success.

West Nile Virus detected in ruffed grouse

M ADISON – West Nile virus was detected in three of 16 ruffed grouse that were sick or dead and submitted by the public to the Wisconsin Department of Natural Resources for testing from October through December 2018.

At this time, there is no evidence to confirm that West Nile virus or any other factor is having population-level impacts on ruffed grouse in the state.

Ruffed grouse populations are known to rise and fall over a nine- to 11-year cycle, so declines are not unexpected, though the 2017 decline occurred before the cycle would typically predict.

Of these 16 birds, 10 were negative for any viral infection, three were positive for Eastern Equine Encephalitis virus, one was positive for WNV and two were positive for both EEEV and WNV. Of the six birds that tested positive for EEEV or WNV, three showed signs of clinical disease, which may or may not have eventually resulted in death.

These results are preliminary, and 238 hunter-harvested grouse samples remain to be tested from the first year of a three-year study of WNV in ruffed grouse across Wisconsin, Minnesota and Michigan.

Preliminary results for year one of this regional exposure study are tentatively anticipated to be available in mid-2019. Ultimately, the timeline for results will depend on the number of samples submitted by each state and the extent to which follow-up testing is required to differentiate between WNV or other similar viruses.

Anyone who finds a sick or dead ruffed grouse is encouraged to submit its carcass for disease sampling – sick or dead ruffed grouse carcasses can be submitted at any time. Observations can be also reported to local DNR Wildlife Management staff.

In addition to sick or dead submitted samples, DNR staff distributed 528 ruffed grouse sampling kits to groups and hunters statewide with assistance from the Ruffed Grouse Society and the Wisconsin Conservation Congress as part of the multi-year regional study (YFR) with Minnesota and Michigan.

Both WNV and EEEV are mosquito-borne viruses that can affect humans, horses and certain species of birds. Clinical signs of WNV in birds are indistinguishable from those of EEEV and can include tremors, weakness and loss of coordination. WNV was first detected in the state in 2002, but only recently has been detected in ruffed grouse. EEEV is considered a native virus and was first detected in Wisconsin’s grouse population in the late 1980s. This historical information suggests that the likelihood of EEEV having population-level impacts on grouse is low.

State wildlife officials say continued focus on habitat management for ruffed grouse is the best method to mitigate potential disease impacts on the population. Ruffed grouse are a short-lived species with only 30 percent of the average adult population surviving year to year. The Great Lakes region contains some of the most extensive early-successional forest habitat and healthiest ruffed grouse populations in the nation. DNR staff are currently working with partners to develop a long-term management strategy for ruffed grouse in Wisconsin.

"Like winds and sunsets, wild things were taken for granted until progress began to do away with them. Now we face the question whether a still higher ‘standard of living’ is worth its cost in things natural, wild and free."

-Aldo Leopold
I hope everyone had a Merry Christmas and a Happy New Year. Currently, things are moving along quite well. The April 12-14th Annual Meeting is just two short months away. Be sure to send in your reservation for the meeting. Also, look on page 5 for the directions on how to submit resolutions at the Annual Meeting. The resolutions are very important as they guide the work of the Federation in the upcoming year. We are lining up speakers and getting the Awards Banquet organized. The Awards Banquet will be held on Saturday night after the Annual Meeting. At the banquet, the well deserving winners of the awards categories listed on page 5 will be honored. If you know of a well deserving conservationist, please nominate them for an award. Nominating new committee chairs and board members is a major part of the Annual Meeting. If you are planning on running for a board or a committee chair position, please contact the nominating committee so you can get on the ballot. (See page 2 for nominating committee contacts). We also have a silent auction at the Awards Banquet. Individuals and Clubs are welcome to donate items for the auction.

We have been working hard on ground water issues in the Central Sands area. Our hard work payed off with the recent court ruling which overturned a rule by the DNR on ground water use. The WWF was a vital part of a coalition which won this major conservation victory. The Shooting Range Committee is hosting a Shooting Range Seminar in Eau Claire on March 23rd. If your club members would like to attend the Seminar contact the WWF office soon as space at the Seminar is limited.

The WWF is looking into participating in an Outdoor Festival on September 7 and 8 in Chippewa Falls. Board members received an email with lots of information on this event. We will need to recruit lots of members to help with this event. No help, No Event. This event will be on the agenda for discussion at our February Board Meeting.

Lastly, I would like to offer sympathy from myself and the entire WWF Board to the family of Ken Barbain. Ken passed away on January 10.

Bill Tollard
President
BUNDLING ON THE LITTLE PLOVER RIVER

This is a follow-up Progress Report to the article posted in WISCONSERNATION’S December issue.

The Little Plover River Stream Bank & Wildlife Habitat Improvement Project is underway. The UWSP Student Body comprised of UWSP Forestry and Water Resources students have been working on the site for the past five weeks, including the first six days of the multi-year project aimed at improving habitat for fish and wildlife on a stretch of DNR land between County Road K and Kennedy Avenue in Portage County.

The Forestry Students are thinning and pruning an oak savannah along the north side of the property while the Water Resources Students are working closer to the stream. We’ve now had four volunteer sessions to assist in bundling tag alders and brushburns bundles near the stream. They will be installed at a later date. Dr. Kyle Herrman and Graduate Student David Palme have been coordinating the thinning and bundling effort.

Local Conservation Clubs and affiliates of the Wisconsin Federation and Trout Unlimited are supplying the volunteers. On December 9th, we had a dozen volunteers working with David Palme. Our crew has come from the Bill Cook Chapter, Almond Rod & Gun, the local T. U. Club and from Federation ranks. The Students had been working three hour shifts in morning and afternoon cuts and prunes. Students have been working three hour shifts.

We received a progress report from David Palme. He indicates that we have now completed 180,000 sq. ft estimated for the project. The Water Resources Students have logged 129.5 hours with some 30 participants. Our Volunteers match up very well with nearly 44 participants logging 164 comparable hours. At this point, we are roughly halfway home with plans to work a couple more afternoons and perhaps the first week of February. David Palme has started a sign-up sheet for the Students. I’ll pass along the schedule and again ask for volunteers as we move into February. It amounts to three hours of fresh air and mild exercise. Hope to see you at the Little Plover.

From the Award Committee

This is your last chance to nominate someone or some club/or- ganization for an award. Deadline to get nomination paperwork to the office is March 8th. There are many deserving people who warrant recognition for their efforts in conservation. Forms are on page 5 in WISCONSERNATION and need to be submitted with the nomination. The Award banquet is April 13th at the Hotel Mead in Wisconsin Rapids. If you need more info contact the office or call 903-876-4312.

Lil Pipping, Chair

 Conservation Leadership Corp

WLCC will be holding their next meeting on Feb. 15th & 16th. The WLCC will be working on their resolutions for the Annual Meeting with their advisors. This looks to be another great session with great ideas. We will talk more after our get together.

Red Cedar Watershed Conference

LAND, WATER AND PEOPLE COMING TOGETHER

THURSDAY, MARCH 14, 2019
AT UW-STOUT, MENOMONIE, WI
Hosted by the
Tamarack Menomin Lake
Improvement Association (TMLIA)

How does the economic and environmental health of the Red Cedar watershed affect you? Economic Development – Sustainable Farming – Water Quality Recreational Activities – Tourism – Personal Health

No matter where you live, in a rural setting, or in the city, this impacts all of us. Join us for a day of exploring how we can all be part of the solution.

Learn more at www.RedCedarConference.TMLIA.org

Planned Keynote Speakers:

- LAND: “Growing A Revolution: Bringing Our Soil Back to Life”
  David R. Montgomery, Professor of Geomorphology, Department of Earth & Space Sciences, University of Washington, Seattle, Washington

- WATER: “Fox Demo Farms: Building a Success Story In Northeast Wisconsin”
  Whitney Priddy, Natural Resources Educator, UW-Extension

  Paul Robbins, Director, Nelson Institute for Environmental Studies, University of Wisconsin-Madison, Madison, Wisconsin

Madison, WI—A ruling today by Milwaukee County Circuit Court Judge Sean A. Hanlon in a lawsuit brought by the Dairy Business Association against the DNR, limited DNR’s authority to regulate industrial livestock operations and our government agencies accountable to the law,” said Midwest Environmental Advocates Staff Attorney Sarah Geers. “We are pleased that we were able to overturn this backroom deal between a special interest group and the state agency that is supposed to protect our health and the health of our environment.”

Governor of the Wisconsin Wildlife Federation described today’s decision as a win for citizens who are harmed by special interest groups’ attempts to roll back environmental protections. “People in every corner of the state are increasingly concerned about the quality of their well water and the health of their lakes and streams. We chose to intervene in this case to prevent DNR from taking a major step backward in environmental law enforcement by giving in to special interest demands. “This ruling is a victory for those of us working to achieve clean, swimmable and fishable waters in the Milwaukee River Basin,” added Cheryl Nenn of Milwaukee Riverkeeper. “Comprehensive state oversight of runoff and other water pollution caused by CAFOs is necessary to help us reach our goals.”

For more information on the DBA v. DNR case, visit Midwest Environmental Advocates website. Midwest Environmental Advocates is a public interest organization that uses the power of the law to support communities fighting for environmental accountability.

Midwest Environmental Advocates website.

Decision Prevents Rollback of Agricultural Pollution Rules

George Pecan is being heralded as a win for public health and transparent government. Judge Pecan sided with four environmental groups represented by Midwest Environmental Advocates when he ruled that an agreement between the Wisconsin Department of Natural Resources and the State’s largest dairy business lobbyist violated state law.

This case demonstrates the power of public scrutiny and citizen action to hold industrial livestock operations and our government accountable,” said Midwest Environmental Advocates Staff Attorney Sarah Geers. “We are pleased
CONSERVATIONIST OF THE YEAR
For the outstanding overall conservation efforts and achievements in any field of natural resource management, for a significant contribution to the cause of conservation, or for meaningful progress or achievement toward a solution of a major conservation problem in the state during the past year. Nominees from all other categories can be considered for the Conservationist of the Year Award.

HUNTER SAFETY EDUCATOR OF THE YEAR
For outstanding efforts by an individual volunteer or organization over an extended period of time in the education of hunter safety. Also such efforts by an individual or organization that has developed an innovative and successful method of educating novice hunters in hunter safety.

CONSERVATION ORGANIZATION OF THE YEAR
For outstanding contributions to the conservation of natural resources by an organization in the state for an extended period of time. Statewide or local organizations including sportsmen’s clubs or civic organizations are eligible. The recipient should have demonstrated keen interest in projects and programs within the state which deal with significant natural resource or issues.

CONSERVATION LEGISLATOR OF THE YEAR
For outstanding legislative accomplishment during their career which has made a significant contribution to the preservation and management of our state’s natural resources.

WILDLIFE OR FISHERIES CONSERVATIONIST OF THE YEAR
For outstanding efforts and accomplishments in making a significant contribution to the management and/or restoration of wildlife resources in Wisconsin.

OFFICIAL CALL FOR RESOLUTIONS!
For presentation at the 2019 Annual Meeting of the Wisconsin Wildlife Federation.

What is a resolution?
• A formal, written motion which follows a specific format.

Why submit a resolution?
• To set and express an opinion of the WWF.
• To set a course of action for the WWF Board of Directors to follow.

What topics should resolutions deal with?
• Issues pertaining to natural resources and their management or the environment.

How should a resolution be submitted?
• Typed on official organization letterhead preferred.
• Signed by the author and/or officer of the submitting organization.
• Postmarked no later than March 5, 2018.

Mail your resolutions to:
Wisconsin Wildlife Federation
Attn: Resolutions
PO Box 460
Poinette, WI 53955-0460

Contact the office for additional information or for specific writing format guidelines.
(800) 897-4161)

OFFICIAL NOMINATION APPLICATION
The Wisconsin Wildlife Federation invites you to nominate a person or group who has shown outstanding conservation effort and achievement in any of the categories listed. To make a nomination, send one copy of this form and a copy of a résumé. Attach all supporting documents and send to the above address. Deadline for receiving nominations is March 5, 2018.

Conservation Achievement Awards

**IPS: WI Supreme Court Asked to Rule on DNR Water Pollution Permit Decision Would Have Far-Reaching Implications for All State Agencies**

**Wisconsin Waterfowl Hunters’ Conference**

**2019 Wisconsin Waterfowl Hunters’ Conference**

March 23-24, 2019

Madison, WI • A case involving the authority of the Department of Natural Resources to regulate water pollution from farm animals could have far-reaching implications for Wisconsin’s water quality. In a decision today, Wisconsin’s DNR Court of Appeals declined to issue a final ruling in the case, but instead asked the Wisconsin Supreme Court to take the case directly and issue a decision.

This development marks a new phase for a case that began more than 6 years ago when neighbors of Kinnard Farms, one of the state’s largest concentrated animal feeding operations, filed a petition with the DNR requesting a court to review the water pollution permit that the farm received, represented by Midwestern Environmental Advocates, the challenge because Kinnard’s water discharge permit did not allow enough to protect water resources and public health from the impacts of the large industrial farm.

In 2018, an administrative law judge issued a decision in the water pollution permit challenge. Two of the most important parts of the decision included orders for groundwater monitoring and capping of the number of animals as enforceable permit conditions. Although DNR originally agreed with the 2014 decision, the agency has recently taken a different position about facts and law. During a recent oral argument on February 4, 2019, the court expressly authorized by statute to issue final rules if the court determines that the permit is issued.

**Word information:**

The court will be the first instance in which the court may issue a permit condition if the court determines that the court will issue a final rule.
Bald Eagle Nest Survey

"2018 was another great year for the bald eagles' remarkable comeback in Wisconsin," says Laura Jaskiewicz, the DNR's Endangered Resources research scientist who coordinates the statewide aerial survey effort. "The number of nests is still increasing throughout the state and we now have them documented in 71 of 72 counties."

The 2018 surveys found a total of 1,959 bald eagle nests occupied by breeding adults, an increase of 105 nests from 2017. That's a 6.6 percent increase and more than 16 times as many nests found in the first detailed surveys in 1974, when bald eagles were listed as state and federally endangered species and only 108 nests were documented. As in past years, Vilas County with 172 nests and Oconto County with 154 nests had the highest totals. Bald eagles prefer to nest in tall trees along water, and these two counties have some of the highest concentrations of freshwater lakes in the world.

"It doesn't seem like we've hit any ceiling yet," Jaskiewicz says. "Eagles are still finding places to nest, some continuing in the same nests for many years and some new ones popping up here and there."

Eye-eagle citizen reports Walworth County nest

While the aerial survey results were conducted in March and April by DNR conservation technicians and DNR pilots, the nest documented in Walworth County was reported by a private citizen. Sharon Fandel put a nest out near her property with the Natural Heritage Conservation program, went to the site and confirmed the nest documented in Walworth County this year results from protections under the state and federal endangered species laws, declining levels of DDT in the environment, and DNR and partner efforts to help monitor and aid recovery. Bald eagles flew off the state endangered species list in 1997 and the federal list in 2007; eagles and their nests are still federally protected under the Bald and Golden Eagle Protection Act and the Migratory Bird Treaty Act.

How the survey information helps protect bald eagles and other survey results

The 2018 Wisconsin Bald Eagle Survey also contains results from the 2018 winter eagle survey conducted by DNR staff and many volunteers, and the report details a new effort in Dane County, with the Natural Heritage Conservation program, went to the site and confirmed the nest documented in Walworth County this year results from protections under the state and federal endangered species laws, declining levels of DDT in the environment, and DNR and partner efforts to help monitor and aid recovery. Bald eagles flew off the state endangered species list in 1997 and the federal list in 2007; eagles and their nests are still federally protected under the Bald and Golden Eagle Protection Act and the Migratory Bird Treaty Act.

- Sheboygan Falls, WI

**Super Nachos**

**Ingredients**
- 1 bag nacho chips
- 1 lb. ground beef
- 1 packet taco seasoning
- 1 large green pepper coarsely chopped
- 1 large onion coarsely chopped
- 1 large tomato coarsely chopped
- 1/2 cups shredded Colby-jack or pepper jack cheese
- 1 can refried beans
- Salsa
- Guacamole
- Sour cream
- Hot sauce

**Directions**
- Spread nacho chips on large cookie sheet. Cook ground beef and burger as per instructions on seasoning packet. Spread taco meat, green pepper, onion and tomatoes on top of chips. Cover with cheese and bake in 350° oven for 10 minutes. While nachos are cooking, warm refried beans on stove top. Serve nachos with refried beans, salsa, guacamole, sour cream and hot sauce.

**Chili Cheese Dip**

**Ingredients**
- 1 package white button mushrooms
- 4 cloves garlic, minced (if you are not a garlic aficionado, one clove is good)
- 1/4 cup parsley, chopped
- 4-5 whole green onions, sliced
- Salsa
- Sour cream
- Guacamole
- Hot sauce

**Directions**
- Wash the mushrooms and remove the stems. To remove the stems, grasp the mushroom cap in one hand and wiggle and then twist the stem with the other. The stem should pop out and leave a nice cavity for the filling.
- Next mince the garlic, chop the parsley and slice the onions. Then, melt butter in a skillet and lightly sauté the mushrooms for about a minute. Remove the mushrooms and add the garlic, parsley, onions and wine. Cook for about a minute. Remove from pan.
- Now remove rind from the brie, cut cheese into small chunks and press into cavity in the mushrooms. Since I used a cast iron skillet for the sautéing, the mushrooms were placed back into the skillet for baking.
- After the brie is in the mushrooms, place the garlic, parsley and onion mixture on top of the mushrooms and bake in a 350° oven for 15 minutes.
