President’s Report
April 2019

Greetings now that I have been officially elected and sworn in, this will be my first official presidential report. Sorry for any confusion last month as there were concerns by readers of what happened to Bill Tullard. Bill is doing just fine and hopefully enjoying his new position as Past President. I cannot thank him enough for all he has taught me going back nearly 30 years to our time in the Winnebago Conservation Club. I think he deserves a lot of thanks from all of us Wisconsin Wildlife Federation members for his many years of dedicated service to the WWF. I can only hope that I will be as strong a leader as he has been.

This last April 12th and 13th we had our annual statewide meeting and award ceremony. We had an outstanding meeting and celebrated the 70th year of the Federation. It was a pleasure to meet with many of the award winners and the graduating class of the Conservation Leadership Corps students. I would love to see the CLC members continue with the WWF and wish them well in their careers in conservation. A big thanks to Lil Popping for her work with the CLC students. Lil’s dedication is guaranteeing that the next generation will carry the conservation torch forward. Also, I want to give a special credit to Betty Borchert for her tireless work with scholarship committee.

Congratulations are in order for all the new directors, associates directors, and officers Pat Quantiano—our new first vice president, and Kevin Quamme—our new second vice president. The by the time this article is published Earth Day will have come and gone, but if we all set a goal to help our environment we can make a huge impact. Remember we don’t need to wait all year for one day to do something for our planet.

The DNR has released its proposed bear management plan, never in all my years in the WWF have I seen a topic that was as polarizing as this plan. WWF members expressed a wide variety of opinions on the proposed plan. A large amount of the controversy came with the recommendation for hound hunting in the new unit C. With this in mind, Executive Director George Meyer will be sending a letter to DNR Secretary Preston Cole asking for a delay in the DNR staff bringing the proposed Bear Management plan to the Natural Resources Board in May. This would enable the WWF to review the final plan, and to hold a committee meeting to make recommendations to the WWF Board in June.

Spring is here, the opening of fishing is just around the corner, and turkey hunting is already in full swing with many of my friends already reporting success. With this in mind remember it’s time to purchase your licenses and stamps. When buying your license consider donating $1 to conservation along with the normal cost of your license. Just think what an additional great conservation work can be done if every license buyer would donate just $1.

And last, remember its fire season, use extreme caution when burning. Until next month—keep your nose in the wind—and your eyes on the horizon.

Craig Chaloner
President
Wisconsin Wildlife Federation
Incoming WWF President Craig Challoner presenting out going WWF President, Bill Tollard with a muzzle loading rifle for Bill service to the WWF.

2019 Executive Committee

“The ultimate test of man’s conscience may be his willingness to sacrifice something today for future generations whose words of thanks will not be heard.”
-Gaylord Nelson
Conservation Warden Dale Hochhausen

Dale Hochhausen is stationed in Onalaska and has responsibility for covering northern LaCrosse County. His station includes both rural and urban areas and has major responsibility for conservation law enforcement along the Mississippi River. Dale has built an outstanding law enforcement program in his area. He focuses on natural resource education, community involvement and enforcement. Dale balances enforcement efforts between fish and game, recreational vessels, DNR recreational property and environmental problems in his area. He documents over 2000 patrol contacts in a year.

Dale is well-respected by other wardens and as such serves as a field training officer for new conservation warden recruits. He has excellent investigative skills and attends virtually every community meeting that has any connection to natural resource use. Dale consistently receives an exceptional rating in all areas of performance. The Federation recognizes Dale as an excellent guardian of the natural resource use. Dale Moody is serving his 40th year as a Hunter Education Instructor in the Madison area. He has been involved in traditional hunter education courses, internet field day classes and hunter adult only classes for a total of 3,216 students certified under the programs. Dale is the Lead Instructor for the Madison Area Instructor Group and leads the planning effort for the 30 total instructors in the group. Dale’s hard working and pleasant way of coordinating the effort and teaching provides an excellent role model for all the instructors in the program.

Dale is very active in mentoring those new to hunting. He has been an active Learn to Hunt mentor since 2012 and a mentor for the Hunt for Food program since it started in 2014, including opening up his own land for the hunts. As a true conservationist he also serves on committees for Ducks Unlimited, Driftless Area Conservancy and the Bluebird Restoration Association of Wisconsin.

Water Conservationist of the Year

Midwest Environmental Advocates

Midwest Environmental Advocates is a nonprofit public interest law firm located in Madison. It represents Wisconsin citizens in court and administrative proceedings for the protection of surface and groundwater, air and waste contamination and the protection of public health and property rights. MEA also works to build and support locally based coalitions of citizens to deal with environmental threats in their communities.

MEA has successfully led several local groups and several conservation and environmental organizations including the Wisconsin Wildlife Federation in a series of petitions to the USEPA seeking to require the State of Wisconsin to comply with the CleanWater Act, the Safe Drinking Water Act and the Clean Air Act. In addition, MEA routinely intervenes in Clean Water Act discharge permit proceedings and files lawsuits to assure that the standards protecting Wisconsin’s lakes, streams and groundwater are met. Wisconsin’s citizens and natural resources are truly fortunate to have the Midwest Environmental Advocates protecting their interests.

Conservation Communicators of the Year

Matt Lallemand and Laurie Groskopf

Matt and Laurie have done an extraordinarily high-quality job in helping create and promote “Wisconsin Wolf Facts,” a website page and a Facebook page dedicated to providing facts about living with wolves in central and northern Wisconsin, the Great Lakes region, western states and across the globe. They have dedicated much time and effort to generating followers on the website, providing some very informative and compelling local videos of the impact of wolves on farmers, ranchers, other landowners and rural areas of public and private land.

In their efforts to create awareness and education on the impact of wolves, they post updates on the website on Congressional, administrative and judicial efforts to delist the wolf from the Federal Endangered Species list, publish DNR Wolf Depredation Reports, and forward interesting articles regarding wolves from all over the country. The information provided by Matt and Laurie strongly supports the need for professional state management of wolves in Wisconsin, Minnesota and Michigan.

Conservation Organization of the Year

Dane County Conservation League

Founded in 1933, The Dane County Conservation League (DCCL) has many conservation accomplishments. DCCL holds regularly scheduled highway clean ups, invites experts to give presentations at their membership meetings, donates funds to local hunter education programs, assists the UW Extension/WDHNR in installation of structures to raise beetles to destroy mature Purple Loosestrife plants in northwestern Dane County.

DCCL has raised over 1000 pheasants for release in their county by members who work at the DCCL pheasant farm. Each year DCCL gives several dozen birds to the Dane County Pheasants Forever Chapter for their annual youth Learn-To-Hunt program. In addition, they have funded a summer intern, two summers in a row, to work with WDFNR at the Buena Vista Wildlife Area to assist in the Prairie Chicken restoration project. This occurs on 4300 acres in the area that in the 1960’s DCCL helped raise funds for the purchase of the land. Wildlife work continues with building and installing many Bluebird, Wood Duck, and Bat houses in Dane County.

Support of youth is also important to DCCL, with ongoing budgeted funds for donation to the Midwest Outdoor Heritage Educational Expo held each spring for elementary students to learn about conservation as well as hunting, fishing, and trapping activities. They also donate to the Portage and Sun Prairie High School Trap shooting teams.

Recently, DCCL established a perpetual scholarship fund at UW St Egeres (UWSP) in 2018 with seed money of $26,000 for $1,000 annual award to a College Junior/Senior enrolled at UWSP.

Nature Center Educators

David Kucuk

Dave is the Executive Director/Naturalist (aka: Mayordom) in Sheboygan since 1967 with a broad background in environmental education. He received his B.A. degree in Environmental Education from St. Olaf College and has been a major proponent of open space protection in Sheboygan County. Sheboygan County is a leader in the state in open space protection through citizen involvement and community support.

Dave has been involved in many conservation and outdoor education projects and working with the City of Sheboygan Parks and Recreation Department, the Sheboygan Conservation Club and the 3rd Grade naturalist program at every elementary school in the county. Dave has a passionate interest in the conservation of the area's natural resources and involves area teachers, students, and families in projects that are meaningful and relevant. Dave is known throughout the region for his ability to make outdoor learning fun and inspiring.

In his capacity as Director of the Nature Center, Dave assists in the development of educational programs, which have earned 3rd grade Naturalist certification for hundreds of area students. He can often be found conducting programs at the Nature Center, in schools, and at area parks. His passion and enthusiasm for the environment are infectious and has stimulated an interest in the natural world in many young people.

School Educators of the Year

Eric Rademaker and David Kucuk

Eric Rademaker, high school social studies education classes and has been involved with five years. Five years, ago. David, Loretta became social studies teacher and immediately formed the Brown County Hunter Education Team and Brown County Hunter Education Team. He has worked with WDNR at the Buena Vista Wildlife Area to assist in the Prairie Chicken restoration project. This occurs on 4930 acres in the area that in the 1960’s DCCL helped raise funds for the purchase of the land. Wildlife work continues with building and installing many Bluebird, Wood Duck, and Bat houses in Dane County.

Support of youth is also important to DCCL, with ongoing budgeted funds for donation to the Midwest Outdoor Heritage Educational Expo held each spring for elementary students to learn about conservation as well as hunting, fishing, and trapping activities. They also donate to the Portage and Sun Prairie High School Trap shooting teams.

Recently, DCCL established a perpetual scholarship fund at UW St Egeres (UWSP) in 2018 with seed money of $26,000 for $1,000 annual award to a College Junior/Senior enrolled at UWSP.

2019 Conservation Achievement Award Winners

The Wisconsin Wildlife Federation honors individuals, affiliates, businesses, organizations and others for their outstanding contribution to conservation.

**Statewide Conservation Educator of the Year**

Sandy Benton

Sandy Benton, an educator who continually finds new ways to infuse conservation education into K-12 classrooms. First as a traditional elementary teacher, then as a founder of an environmentally-focused charter school, following in that role as a literacy coach, to now a full-time instructional coach with the Wisconsin Green Schools Network, Sandy has been making learning relevant for students by engaging them in authentic learning experiences rooted in their place for over thirty years. In 2012, Sandy’s excellence in education was recognized with the Presidential Innovation Award for Educational Excellence for her role in establishing the Fox River Academy in the Appleton Area School District. Under her leadership, this urban school grew to engage students in authentic inquiry exploring the historical, cultural, and economic importance of the Fox River.

**Forestry Professional of the Year**

Chris Schmitz

Chris has worked as a forester since earning his college degree in Forestry from Vermilion Community College. Working with non-industrial private forest landowners, having been a Private Lands Forester, and currently the Tax Law Forestry Specialist for Clark and Jackson Counties; Chris has gained a lot of knowledge and experience. In his current professional position, Chris provides guidance and assistance to private landowners in areas of sustainable forest management, management plans, timber sales, reforestation, recreation, wildlife management, forest health, and the Forest Tax Laws.

**Youth Conservationist of the Year**

Adam Tess

A Sun Prairie High School Senior, Adam Tess is a model to students, youth, and adults with his willingness to help while taking into account his busy schedule with school, athletics, extracurricular events, work, church and other commitments. Adam and his twin sister, Alex, were named the National FFA Forestry Team for 2019, a title that demonstrated their love of the field in many ways, including mentoring new trainers forsters and interns, planning and executing a very demanding county forest and private forestry law workload. Chris also exists as advances in the Green Bay regarding urban forestry issues as a volunteer.

**Wildlife Conservationist of the Year**

Brad Koehl

Brad Koehl began his career with the WDNR in 2001 as the Project Coordinator for Deer 2000. He soon moved to the Big Game Assistant, and in 2007 to a wildlife biologist position to charge of the Agricultural Damage Program. Assisting duties for wolves in 2012 when delisting occurred, his current responsibilities are: Ag Damage, nuisance wildlife, wildlife damage, wildlife damage permits and programs. In the wolf program, Brad is able to work within WDNR to update the wolf depredation list as soon as wildlife service investigative reports are approved, and working with IT resulted in current status placed on the DNR wolf depredation listing and map; giving the public timely information about all incidents involving wolves. In addition, Brad worked with the Farm Bureau to create text and email alerts for incident involving wolves, bears, and coyotes. Again, giving the public timely information.

In the bear damage program, Brad has established a customer group that has improved communication on bear damage by working with user groups to install trap monitors.

Brad often partners with state, local and county groups to meet and discuss issues; to make improvements to the programs he manages, leading to a greater public acceptance of the WDNR wildlife damage programs and how cooperation is essential for supporting wildlife.
Resolution to Fund the Forestry Act in the 2019-2021 Budget

WHEREAS, Wisconsin's woodlands were cut and burned in the late 1800's and early 1900's; and

WHEREAS, in 1927 the Wisconsin legislature enacted Act 31 to preserve Wisconsin's natural resources and expand outdoor recreational opportunities; and

WHEREAS, Wisconsin's forested lands are the foundation for natural habitats, ecosystems, and economic prosperity; and

WHEREAS, the Knowles-Nelson Stewardship Fund provides a stable source of funding to restore, acquire, and protect the diverse natural resources of the state and to promote sound forestry land management across the state and for other specified forestry purposes; and

WHEREAS, because of the availability the Forestry Fund created by the mill tax, private lands have been restored to cover about 16 million acres or 46 percent of Wisconsin's land base; and

WHEREAS, the Forestry Fund has provided a critical funding source for DNR land acquisition programs and ecosystem management projects throughout the state; and

WHEREAS, Wisconsin's forested lands are an important forest management tool for supporting quality of life and promoting the economic vitality of Wisconsin; and

WHEREAS, the Forestry Fund has provided a stable source of funding to restore, acquire, and protect the diverse natural resources of the state and to promote sound forestry land management across the state and for other specified forestry purposes; and

WHEREAS, where the availability of the Forestry Fund created by the mill tax, private lands have been restored to cover about 16 million acres or 46 percent of Wisconsin's land base; and

WHEREAS, the Forestry Fund has provided a critical funding source for DNR land acquisition programs and ecosystem management projects throughout the state; and

WHEREAS, Wisconsin's forested lands are an important forest management tool for supporting quality of life and promoting the economic vitality of Wisconsin; and

WHEREAS, the Knowles-Nelson Stewardship Program was established in 1999 to acquire and preserve Wisconsin's natural resources and expand outdoor recreational opportunities; and

WHEREAS, the Knowles-Nelson Stewardship Program was established in 1999 to acquire and preserve Wisconsin's natural resources and expand outdoor recreational opportunities; and

WHEREAS, the Knowles-Nelson Stewardship Program was established in 1999 to acquire and preserve Wisconsin's natural resources and expand outdoor recreational opportunities; and

WHEREAS, the Knowles-Nelson Stewardship Program was established in 1999 to acquire and preserve Wisconsin's natural resources and expand outdoor recreational opportunities; and

WHEREAS, the Knowles-Nelson Stewardship Program was established in 1999 to acquire and preserve Wisconsin's natural resources and expand outdoor recreational opportunities; and

WHEREAS, the Knowles-Nelson Stewardship Program was established in 1999 to acquire and preserve Wisconsin's natural resources and expand outdoor recreational opportunities; and

WHEREAS, the Knowles-Nelson Stewardship Program was established in 1999 to acquire and preserve Wisconsin's natural resources and expand outdoor recreational opportunities; and

Working in the upper great lakes wolf population is functionally connected on both sides to the much larger Canadian wolf population (around 50,000 for all of Canada). Therefore, there is no reason to fear a lack of genetic diversity.

Depredation payments and incidents dropped precipitously after wildlife services was allowed to provide lethal controls in agricultural depletions and the wolf harvest was held (see fiscal payments in 2013, 2014, and 2015). These payments dropped down to a level that was achieved in 2008, when the minimum wolf count was around 550.

Every legitimate scientist agrees that the wolves are recovered in the US, and particularly in the upper great lakes. The delisting report notes that it was never the US Fish and Wildlife Service's intention to reduce the wolf population, only in 2013 was the population reduced. The Fish and Wildlife Service delisting document makes it clear that they are aware of our goal and support our current goal.

Federal Register Wolf Delisting Public Comments Welcome

The Federal Register is now accepting public comments regarding the recent order to delist wolves nationwide. The best way to find this document is to search “federal register wolf delisting.” The site will provide you instructions on how to make a comment (by computer or mail) and a lengthy written notice of the delisting order.

Everyone who has an interest in wolf delisting should be providing comments on the delisting. While we have been through this many times, it is still important to make your opinion known. Keep in mind that the personal comments section will be part of the public document. Please remember to stick to the facts and be civil.

Some points to remember:

• Federal delisting in Wisconsin has always been set at 80 wolves for a period of three years. This level was set during the period from 1995 to 1998, with growth in numbers above this for twenty years.

• In 1998, the minimum count was 178 and 47 packs. Wisconsin's goal is 350 estimated minimum count and 109 packs. The US Fish and Wildlife Service delisting document makes it clear that they are aware of our goal and support our current goal.

• During three wolf public harvest seasons, although the stated objective was to reduce the wolf population, only in 2013 was the population reduced. The delisting document makes it clear that the US Fish and Wildlife Service has no doubts about Wisconsin's ability to manage wolves responsibly.

• After the 2012 wolf season, Wisconsin's minimum count dropped slightly from 815 to 809. After 2013, it dropped 809 to 860. After 2014 it rose from 660 to 744. In the 2018 minimum count, Wisconsin saw a minimum of 905 wolves using the methods it uses to detect wolves. This included an increase in packs from the previous count, to 238 packs.

• US Fish and Wildlife Service delisting makes it clear that the upper great lakes wolf population is functionally connected on both sides to the much larger Canadian wolf population (around 50,000 for all of Canada). Therefore, there is no reason to fear a lack of genetic diversity.

• Depredation payments and incidents dropped precipitously after wildlife services was allowed to provide lethal controls in agricultural depletions and the wolf harvest was held (see fiscal payments in 2013, 2014, and 2015). These payments dropped down to a level that was achieved in 2008, when the minimum wolf count was around 550.

Every legitimate scientist agrees that the wolves are recovered in the US, and particularly in the upper great lakes. The delisting report notes that it was never the US Fish and Wildlife Service's intention to reduce the wolf population, only in 2013 was the population reduced. The Fish and Wildlife Service delisting document makes it clear that they are aware of our goal and support our current goal.

Comments will be accepted through May 14, 2019.

Bipartisan RECLAIM Act Would Expand Rural Community Revitalization, Support Wildlife

The RECLAIM Act will strengthen distressed rural communities by investing in economic development; accelerating the revitalization of abandoned coal mine lands and streams impacted by the legacy of this waning extractive industry.

Natural Resources Board approves migratory bird hunting seasons for 2019

As a reminder to California goose hunters, registration of California goose and in-field validation of the California goose hunting permit is no longer required.

Early season dates are as follows:

• Early Teal, Sept. 1-9: six teal (blue-winged or green-winged) per day, sun
• Early Goose, Sept. 1-15: five Canada goose per day, 20 light geese per day (Snow/Blue and Ross’s)
• Upland Game Bird Season: Sept. 21 to Nov. 29: 15 bird per day; and
• Woodcock, Sept. 21 to Nov. 4: three woodcock per day.

Duck season dates and bag limits are as follows:

• Opening day hunting hours begin one-half hour before sunrise for all regular waterfowl hunting seasons.
• Youth Hunt: Sept. 14-15;
• North Zone: Sept. 25 to Nov. 30; and
• Mississippi Zone: Sept. 28 to Oct. 4 and Oct. 12 to Dec. 3 (seven-day split, closed Oct. 5-11).

The daily bag limit statewide is six ducks, including no more than:

• Four mallards, of which only one may be a hen;
• Two black ducks; and
• Two Canada

The daily bag limit for woodcocks is three per day.

Regulate goose hunting season

With the elimination of the Horicon Canada goose management zone, the state now regulates Canada goose hunting seasons in counties with the largest goose hunting permits in the state. The Mississippi River is a sub-watershed in the zone.

The Natural Resources Board approved the incorporation of a second split in the South Zone, which would create two distinct harvest seasons of the South Zone duck season and reopen again on Dec. 14 and run through the Christmas holiday.

Exterior Zone (92 days total):

• North Zone: Sept. 16 to Dec. 16;
• South Zone: Sept. 16 to Dec. 6 (5-day split); and
• Mississippi Zone: Sept. 28 to Oct. 4 and Oct. 12 to Dec. 3 (seven-day split, closed Oct. 5-11).

Another annual meeting, another amazing end to a year

On April 12th, 2019 CLC Class 6 arrived for their final ses- sion. Friday night students enjoyed a pizza dinner before a busy night of activities. Saturday morning students socialized before our traditional Friday night speaker. This year we had the pleasure of having presentation by Christine Thomas, Dean of the College of Natural Resources at the University of Wisconsin-Stevens Point. We also had Mark Smith from the National Wildlife Federation speak to us on the invasive species of Asian Carp. Afterwards the CLC held elections for the next year’s executive committee. Our newly elected officers are Wyatt Benton- President, Carl Meck- er- Vice President, Simon Collum- Publicist, Nicole Leffler- Event Coordinator.

Jordan Kitchen- Secretary, Bradley Var- nee- Treasurer and Hunter Nikolai will hold the Past President position seeing that he was the President for the previ- ous year.

On Saturday, April 13th, 2019, both current CLC students and alumni pre- sented their policy resolutions to the WWF. Everyone did an amazing job! The CLC would like to give a special thank you to The Izak Walton League for making a donation to the CLC scholar- ship fund once more. At lunch the CLC presented our ‘Mentor of the Year’ award to Todd Amb, Assistant Deputy at the DNR, delivered the keynote Address to the 2019 annual meeting. Mr. Ambi underscored the importance of the Public Trust Doctrine in managing Wisconsin’s waters. He spoke about the role of the Governor’s Executive administrative and the Legislature to work on water quality problems in the state. He also spoke about the importance of making science based decision making on conservation issues and that DNR personnel will be giving science based testimony on DNR related legislation. Mr. Ambi also spoke about the complex nature of PFOS and the beginning of clean up the students received their scholarships and certificate of completion from the program. It was another exciting year in the CLC and we are looking forward to see- ing what the seventh year of the Conser- vation Leadership Corps brings.

**Smoked Country Style Ribs**

- 1 or 2 packages of country style ribs
- Carolina Style BBQ sauce
- 1 cup prepared mustard
- ½ cup sugar
- ½ cup brown sugar
- ½ cup cider vinegar
- 2 tablespoons black pepper
- ½ to 2 teaspoons of cayenne pepper depending on your heat preference
- 2 tablespoons sugar butter

**Directions**

- Place ribs in smoker and cook according to smoker directions. If your smoker is old school use a combination of lump charcoal and presoaked wood chips/chunks. Recommended woods include apple and hickory.
- About an hour before the ribs are done, mix all ingredients for the sauce together and cook for 30 minutes. When ribs are done, place in Dutch oven and spread BBQ sauce on them. Warm over low heat for 20 to 30 minutes to flavor sauce through meat.

**BBQ Trout**

- 6 trout
- Salt and pepper
- Flour
- Olive oil
- ½ cup dry white wine
- ½ cup BBQ sauce
- Oregano

**Directions**

- Season fish with salt and pepper and coat lightly with flour. Fry until half done. Place in a casserole dish. Mix water, wine, BBQ sauce and lemon juice, and baste trout with mixture. Bake in oven at 375° for 30 minutes.
- Baste fish several times while baking. Sprinkle with oregano before serving.

**Lemon Bars**

- Mix all ingredients together and pour into a 9 x 13 pan. Bake for 10 minutes in oven 350°.

**Directions**

- Mix all ingredients together and pour over crust. Bake for 25 minutes at 350° until lightly browned on top. Sprinkle with powered sugar while still warm.
